

Partners in Care, Partners of *Choice*...

Welcome to Centric Health Corporation,
a new Canadian healthcare company.

Our partnership with a community of healthcare professionals and dedicated staff – more than 10,000 healthcare professionals in 750 Centric Health locations across Canada – positions us to deliver exceptional patient care. And we're growing.

Working together, we combine the highest service and ethical standards with the best possible clinical outcomes. This is our unique brand of care.

Our vision is to become Canada's premier healthcare company with a complete range of innovative and whole-life solutions centred on patients and healthcare professionals.

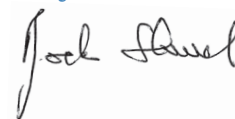

Centric Health offers Canadians greater choice in:

- Medical assessments, physiotherapy and rehabilitation
- Eldercare and homecare
- Pharmacy, medical products and home medical equipment
- Surgical and medical centres
- Diagnostics

One of the foundation pieces of the Centric Health brand in Western Canada is the strong and vital presence of our partners in British Columbia. I'm delighted with this unique opportunity to shine the spotlight on their work and achievements...within their communities and over the world.

The Centric Health provider community and network of healthcare professionals in B.C. are partners of choice. They are committed to delivering quality patient care, the right care at the right time. These same values are held across Canada, wherever Centric Health has operations.

Please read on and discover this for yourself.
